**Full moons occur when** the moon moves in its orbit so that the earth is “between” the moon and the sun. The light of the moon so visible to us illuminates the shadows in ourselves so that we can reflect and refocus. This is a **time to let go of things that are no longer serving our greatest good, offer gratitude, and make space for what is to come!**

-Aquarians are represented as the water bearers and offer their **gift of truth, authenticity, freedom, individuality, knowledge, and detachment** to the rest of the zodiac. Aquarian placements are often reflected in humans through: being light seekers; progressive big picture ideas; clear thinking; a sense of expansion; and, freedom from emotional agendas. They are highly attuned to a sense of “brotherhood”, friendship, and humanitarian pursuits.

-Utilize the energy of this transit by pondering any unhealthy attachments you could release; what “norms” are no longer serving you; what part of your identity is no longer aligned with the “future you”; and how you can take greater responsibility for your purpose in life. **Another key aspect to this full moon** is the completion of something (an idea, action, conversation, etc.) begun in February 2021 that was revisited in November 2021. New structures around this are likely to begin merging.

In the quiet darkness, our deeper needs and bigger dreams may come to fruition. This is a **time of expansion, manifesting, planting seeds of growth, and asking the universe for what you want!**

Since we already learned a little about Virgo energy - utilize the energy of this transit by pondering how you can grow/what you can manifest that is related to the way you process and share information and ideas. What could you simplify in your life? What do you need to bring order and cleanliness to? What is a new way you can communicate and share with others?
